3M™ Trizact™ Abrasives—A truly amazing technology for a perfect finish.

3M™ Trizact™ Abrasives feature pyramid-shaped structures that contain multiple layers of abrasive mineral. So when the abrasive wears, fresh, sharp minerals are continuously exposed. The result is a consistently smooth finish unlike anything you've ever seen.

The pyramid-shaped structures (above left) are uniformly distributed over the entire surface of 3M™ Trizact™ Abrasives to ensure consistent performance and eliminate variation. Conventional abrasives (below left) with randomly arranged minerals wear and finish unevenly.
