

3M Science.
Applied to Life.™

Paint rectification in just 1-Step polishing.

Thanks to new 3M™ Trizact™ 8000
and new purple cap liquids

New finer grade 3M™ Trizact™ 8000.

Achieve 1-Step polishing with our new 3M™ Trizact™ 8000 grade technology. Simply follow the 3000 3M™ Trizact™ step by refining the sanded finish with the 8000 grade 3M™ Trizact™ before polishing.

Next generation polish.

3M™ Perfect-It™ Famous Finish and 1-Step Finish remove fine scratches from 8000 grade 3M™ Trizact™ on fresh paint to provide a durable high gloss finish.

A professional, accomplished job.

3M paint rectification system combines to achieve a consistent high-quality finish first time, every time with a more efficient, faster process. Just two 3M™ Trizact™ sanding steps for an excellent result: 3000 and 8000 grades. Followed up with 3M™ Perfect-It™ Famous Finish or 1-Step Finish.

Achieve a high gloss finish in 1-Step.

These polishes allow you to eliminate the use of traditional rubbing compounds and machine polishes, while still leaving a high gloss finish with minimal swirl marks. They provide the cut of a compound and the swirl-free finish of a polish, the wetter formulation allows for longer work time without drying and they wipe off easily, requiring less clean-up time.

3M™ Trizact™ - Abrasion of exception

With 3M™ Trizact™ microreplicated technology, you benefit from a precision engineered abrasive. This is constantly regenerated to help you achieve a consistent finish during the scratch refinement process.

3M™ Trizact™ consists of identical microreplicated pyramids on a foam support containing layers of an abrasive mineral. As the construction wears during use, fresh abrasive particles are constantly exposed at the cutting surface which provides a consistent finish without deep scratches.

Cleaner, faster, more efficient

- Pyramid structure.
- Reduced process time.
- Consistent finish and durable gloss after polish without die-back.
- Consistent, uniform and reproducible finish.
- Extended life.
- Foam support enhances swarf removal.

3M™ Hookit™ Trizact™ Fine Finishing Foam Discs reduce the amount of time spent on paint polishing. By adding this innovative product to our range, we have reinvented the process for fresh paint rectification, delivering better results and helping bodyshops improve both cycle time and customer satisfaction.

3M™ Trizact™ 3000 & 8000 are available in 75 mm & 150 mm Hookit™ disk.

3M™ Perfect-It™ Famous Finish

- Originally developed for OEM plants using hard clear coats and for operators polishing all day long.
- No hazardous logo, very low odour.
- Long working time capability.
- Using Famous Finish quickly removes 8000 Trizact™ scratches to give a durable high gloss, especially on fresh paint.
- Coloured white and available in 1 kilo and 0.5 kilo bottle.

New 3M™ Purple Foam

- Developed to provide excellent results with either Famous Finish or Perfect-It 1-Step Finish.
- For optimal performance, use a rotation speed between 800 to 1400 rpm.
- Convoluted surface reduces heat generation.
- Available in 80 mm and 150 mm diameter Hookit™ conversions.

3M™ Perfect-It™ 1-Step Finish

- Uses high quality abrasive mineral for fast finishing after 3000 and 8000 grit scratches.
- Low odour, wetter formulation allows for a long working time without drying.
- Coloured light purple the product has excellent clean up properties, wiping off easily for reduced clean up time. Available in 1 kilo and 0.5 kilo bottle.

3M™ High Performance Microfiber Wipe Pink

- Cleans to give a dust free surface after polishing.
- Cleans perfectly without generating micro scratching.
- Robust and very long lasting.

For dark colour, to remove holograms

3M™ Perfect-It™ Ultrafina SE

- Get an exceptional high-gloss blemish-free finish.
- Quick and easy clean-up.
- Use a minimal sling.
- Easy to handle and excellent clean-up.

For dark colours, if holograms remain, follow with 3M™ Perfect-It™ Ultrafina (Swirl Elimination) with Blue foam pad.

Famous Finish vs 1-Step Finish

3M™ 55535 Finish Control Spray

- Ideal to check progress in any finishing operation, particularly to see if micro scratches from previous sanding steps are polished out.
- Compatible with all cured refinish paint systems, leaving any surface clean and ready for inspection.
- Removes compound residue.
- Reduces risk of micro scratches.
- Helps achieve excellent finish result.
- Leaves a clean, streak-free finish.
- Available as a 500 ml aerosol.
