*Permanent Restoration
Products for Professionals*

WE KNOW WHAT PERMANENT MEANS!®

Use the **POR-15® 3-Step System to Stop Rust Permanently!**

POR-15® products are designed to work as a complete system. When used together, they provide a coating that not only stops rust, but prevents it from returning. All **POR-15®** products are available individually, and many are available in money saving kits geared to your specific restoration need. Here is how the system works:

CLEAN IT!

STEP 1 - Clean & Degrease Surface

Clean metal surfaces with water-based **POR-15® Cleaner Degreaser**. It removes dirt, grease, wax and other contaminants that interfere with restoration.

See [page 4](#) for more information.

PREP IT!

STEP 2 - Neutralize Rust; Etch Metal

Spray **POR-15® Metal Prep** on the surface to remove rust or prepare it for **POR-15® Rust Preventive Coating**.

Metal Prep neutralizes rust, etches metal for better adhesion, and coats it with zinc phosphate for permanent adhesion. See [page 5](#) for more information.

COAT IT!

STEP 3 - Apply Rust Preventive Coating to Surface

Apply 2 thin coats of **POR-15® Rust Preventive Coating**.

You'll get an unbelievably tough, hard, finish that won't crack, chip, or peel. It's so tough you can pound it with a hammer and not damage it! That's **REAL** protection! See [page 6-7](#) for more information.

Then Topcoat the Surface

Finish your job with a **POR-15® Top Coat** or any other **POR-15®** coating that suits your needs.

POR-15® high performance coatings revolutionized rust protection. These state of the art products form an impenetrable barrier that protects a variety of surfaces from water, chemicals, salt, UV rays, corrosive contaminants, and every day wear and tear. POR-15® products have been applied to thousands of vehicles around the world from celebrated restoration shops to antique car museums and classic car shows.

P.O.R. Products, the makers of POR-15®, is a family-owned company headquartered in New Rochelle, New York complete with our own team of chemists and a state-of-the-art manufacturing facility on-site. For nearly a century, we have been committed to innovation and quality control with an emphasis on personal and professional customer service. P.O.R. Products continues to evolve through research and development to grow our achievements in the industry.

Clean It!

Cleaner Degreaser

Cleans and Degreases in One Application

POR-15® Cleaner Degreaser cleans and degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because it can be diluted with water to 4, 5, and even 10 times its volume while remaining even more potent than other cleaners. POR-15® Cleaner Degreaser removes grease, oil, mildew, algae, musty odors, soap films and wax. Use it to clean canvas, vinyl, nylon, holding tanks, grease traps, auto parts and more. Before applying ANY rust preventive coating or paint, you MUST remove all oily film or residue to be absolutely certain of good adhesion.

APPLICATIONS:

- Engines
- Suspension Components
- Transmissions
- Grease Traps
- Floor Pans
- Fuel Tanks
- Frames
- Rubber, Nylon, Vinyl
- Water Line Scum

PRODUCT	SIZE	CODE
Cleaner Degreaser	Gal.	40101
Cleaner Degreaser	Qt.	40104

“ We used the POR-15® Cleaner Degreaser to remove any surface oils or other contaminants on the metal. After primer, the correct semi-gloss black paint from POR-15® was applied with a spray gun and compressor on all parts of the frame. ”

– Rod and Custom Magazine.

Prep It!

Metal Prep

Etches Metal and Leaves a Zinc Phosphate Coating

Now that you've degreased and cleaned your metal, use POR-15® Metal Prep to guarantee the best paint adhesion on ANY metal surface, including aluminum and shiny polished metal surfaces. POR-15® Metal Prep etches metal, leaves a zinc phosphate coating, and creates the perfect anchor pattern for any topcoat, especially our incredible POR-15® Rust Preventive Coating.

PRODUCT	SIZE	CODE
Metal Prep	Gal.	40201
Metal Prep	Qt.	40204

FEATURES:

- Easy-to-Use, One-Step Process Coats Metal with Zinc Phosphate
- No Harmful Residues
- Insures Perfect Paint Adhesion
- Reusable
- Provides Perfect Base for All Paints
- Removes Surface Rust in Minutes!
- Gives Better Welding Conductivity

“ ...we located the rustiest car we could find and performed a complete floor pan replacement. The key to the repairs is etching the new metal with Metal Prep and sealing it with POR-15® and paint... This ensures that rust will not be a problem in the future. ”

– Muscle Car Review Magazine.

Coat It!

POR-15[®] Rust Preventive Coating

No Need to Remove Rust First!

The secret lies in POR-15[®] Rust Preventive Coating's curing process. Most paints dry through evaporation, but POR-15[®] Rust Preventive Coating dries faster when moisture is present. It has the opposite chemistry of ordinary paints. Now add to that POR-15[®] Rust Preventive Coating's incredible hardness, toughness, and flexibility, and you have a coating that is practically indestructible. POR-15[®] is great for auto restoration and this incredible product is now sold in 52 countries around the world.

Use POR-15[®] to protect expensive and valuable equipment against rust and abrasion. POR-15[®] also has excellent "surface tolerance," which means it works very well on porous surfaces.

POR-15[®] is available in gloss black, semi-gloss black, silver, gray, and clear.

APPLICATION TIPS

Use new DAUBERS for getting POR-15 into hard-to-reach places (available on page 28)

FEATURES:

- 1 Qt. covers 96 sq. ft. / 1 liter covers 9.2 M2
- Double the solid content of most paints
- Compatible with all paint systems
- Tested to over 450°F / 232°C
- Exceeds 2000 hours salt spray test
- Self-leveling
- Hammer tough
- Single Component
- Dries faster in humid conditions
- Repels all fuels and oils
- Resistant to most acids and alkalis

“ POR-15[®] is great, has never failed me, it's a product I count on for many of our projects. **”**

– Steve Darnell of Welderup

- **forms, concrete, storm grates, transformers**
- **Marine** – decks, bilges, hulls, pipes, chain lockers, masts
- **Also excellent for sealing and repairing fiberglass**

POR-15[®] Dry Time Accelerator

Additive for POR-15[®] Rust Preventive Coating

POR-15[®] Dry Time Accelerator is an additive specially formulated for use with POR-15[®] Rust Preventive Coating. Dry Time Accelerator is designed to accelerate the cure time of POR-15[®] Rust Preventive Coating by 30-50% without affecting the ultimate physical properties. Developed to allow for a more efficient production environment, Dry Time Accelerator reduces recoat and dry time and enables you to move on to the next phase faster, without compromising product performance.

The accelerator is added to POR-15[®] Rust Preventive Coating by volume and should be thoroughly mixed. Once mixed, the cure time is typically reduced by 30-50%.

Important: Adding the accelerator drastically reduces the cure time (*time you have to apply to your substrate*) and under humid and warmer conditions the dry time is significantly quicker.

We recommend testing to ensure your specific needs are met. One 8 oz. bottle of POR-15[®] Dry Time Accelerator is enough for 32 quarts or 8 gallons of POR-15[®] Rust Preventive Coating.

Dry Time Accelerator	8 oz.	40616

Prime It!

Weld-Thru Primer

Weldable Zinc Enriched Primer

POR-15® Weld-Thru Primer can be applied over cured POR-15® Rust Preventive Coating and all POR-15® topcoats to enable quick refinishing and recoating of these products. POR-15® Weld-Thru Primer also adheres well to steel, aluminum, stainless steel, brass, and other primed and painted surfaces.

Terrific over cured
POR-15® Rust
Preventive Coating

PRODUCT	SIZE	CODE
Weld-Thru Primer	Spray 15 oz.	41418

High Build Primer

Buildable & Sandable

For years we've worked on a primer to paint over well-cured POR-15® Rust Preventive Coating. We wanted one that was buildable and sandable and easy to apply. POR-15® High Build Primer is the answer. It has great interlocking adhesion qualities and very little preparation is necessary to get a top-notch bond. With a solids content of 60%, High Build Primer has all the body it needs to do the job right with great leveling as well as to overcome surface irregularities.

Prime It!

Self Etch Primer

POR-15® Self Etch Primer is the perfect solution for painting over top of cured POR-15® Rust Preventive Coating. This terrific, high-tech coating will gently etch cured POR-15® Rust Preventive Coating, making the perfect surface for bonding with the paint of your choice. Now you can use POR-15® Rust Preventive Coating for the ultimate protective coating, while also finishing with any of our single or two part topcoating paint!

*Terrific over cured
POR-15® Rust
Preventive Coating*

You'll love the way it bonds to cured POR-15® Rust Preventive Coating, and the way other paints bond to it.

Note that very old, cured POR-15® Rust Preventive Coating finishes may still require light attention with some coarse sandpaper. For best application, Self-Etching Primer should be sprayed.

PRODUCT	SIZE	CODE

Detail Paint

Replicate the look of metals on original cast parts.

POR-15® Detail Paint provides professional grade finishes that reproduce the original look of cast parts. POR-15® Detail Paint is perfect for water pumps, intake manifolds, and master cylinders. Designed to protect against rust, all the colors are developed to have a low sheen, and will not yellow to keep your restored component looking factory new.

POR-15® Detail Paint is formulated to provide maximum corrosion resistance and protect metal substrates against weather, sunlight, oil, and water.

Engine Enamel

Restore, brighten or customize your engine with **POR-15® Engine Enamel**.

This durable direct to metal coating creates a smooth, high-gloss finish that withstands the rigors of the engine compartment while improving the look and preventing corrosion of the metal components. **POR-15® Engine Enamel** withstands intermittent temperatures up to 500°F (260°C). In addition to its exceptional long-term gloss and color retention it resists damage from oil, gas, grease, salt, humidity, solvents and of course rust.

POR-15® Engine Enamel is formulated to match O.E.M. standards and to keep engine surfaces from pitting and rusting and deliver the look and performance expected from **POR-15®**.

Rubberized Under Coating

POR-15[®] Rubberized Under Coating is a flexible, paintable, black coating. It will protect against moisture, dust, heat and cold. It is an excellent moisture barrier and creates an effective sound barrier that reduces vibration and deadens sound in wheel wells, quarter panels, fenders, frames and under carriages. Provides superior adhesion to both painted and unpainted surfaces. **POR-15[®] Rubberized Under Coating** has superior resistance to road salt and will resist chipping and abrasions.

Apply directly over **POR-15[®] Rust Preventive Coating** for the toughest rust, corrosion, and moisture barrier possible along with excellent sound and vibration deadening.

Fill It!

Patch

*The Ultimate Filler/Adhesive
Apply right over rust or metal*

Filler and Seam Sealer

For years our customers have asked us for a thicker version of our world-famous **POR-15® Rust Preventive Coating**, to use for filling seams or holes. Here it is! **POR-15® Patch** is, quite literally, **POR-15® Rust Preventive Coating**, in a tube, and like **POR-15® Rust Preventive Coating**, it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents. It's so tough it may actually add strength to weakened metal. And it won't absorb moisture and swell like conventional body fillers.

PRODUCT	SIZE	CODE
Black	4 oz.	49013
White	4 oz.	49023

USE IT TO:

- Permanently seal seams
- Patch holes in steel, wood, or plastic
- Fix holes in fuel tanks
- Bond steel to plastic, wood, or concrete
- Repair concrete and cinder blocks

Epoxy Putty

Industrial Pliable Filler

This incredible epoxy putty product is so strong you can drill and tap it, yet gentle enough that you can apply it with your bare fingers.

And since it is water-based, you can simply wet your fingers, and work it until it is almost perfectly smooth before it dries – eliminating most sanding! But when it cures, it's rock hard, making it perfect for repairing steel, plastics, concrete, etc. Amazingly, it even sticks to damp surfaces, and will cure under water.

PRODUCT	SIZE	CODE
Epoxy Putty	1 lb.	49033

FEATURES:

- Malleable consistency, fill in anywhere
- Hardens like steel
- Mixes like clay & Cures in water
- No measuring or weighing
- Stays in place, doesn't slump or sag
- Can be sanded, drilled, machined, sawed & painted

Stop Rust Kit

A super starter kit complete with our 3-Step System!

This kit contains everything you need to use our 3-step rust-stopping system. The POR-15® 3-Step System is designed to stop and/or prevent rust on metal surfaces and ensures the best results when applying POR-15® Rust Preventive Coating. The clear-cut process allows for the proper cleaning, prepping, and coating of metal to create a non-porous surface that seals and protects from water, chemicals, and salt, and other corrosive contaminants.

PRODUCT	COLOR	CODE
Stop Rust Kit	Gloss Black	40909

KIT CONTAINS:

- 8 oz bottle POR-15 Cleaner Degreaser
- 8 oz bottle POR-15 Metal Prep
- 4 oz can POR-15 Rust Preventive Coating
- Paint Brushes, Latex Gloves
- Detailed Instructions

FEATURES:

- Covers a 6 sq. ft. area with two coats
- Ideal for small projects such as small subframes, axle replacements, control arms, brake shields, and more
- Results in a hammer-tough finish resistant to most acids and alkalis, and repels all fuels and oils

Step-by-Step System Use

Step 1: Remove dirt, grease, wax, and other contaminants with Cleaner Degreaser

Step 2: Neutralize rust, etch metal, and coat with a zinc phosphate surface with Metal Prep

Step 3: After washing and drying, coat with POR-15® Rust Preventive Coating.

Floor Pan & Trunk Restoration Kit

You'll save hundreds of dollars over replacement... and your restoration will be better than replacement because you'll never see rust again, whether it's a daily driver or a show car. You can maintain the integrity of the structure with no ugly welded seams. Our easy step-by-step instructions make it simple to restore floor pans, trunk pans, pickup truck beds, etc. You'll be amazed how complete it is... Everything you need is at your fingertips! Order your kit today!

KIT CONTAINS:

- Cleaner Degreaser
- PowerMesh Reinforcing Fabric
- POR-15® Rust Preventive Coating (silver & black)
- Metal Prep Solvent
- Safety Face Mask
- Dispensing Scoop
- Epoxy Putty
- Top Coat Chassis Black
- All Four Brushes Needed
- Latex Gloves

PRODUCT	CODE
Floor Pan & Trunk Restoration Kit	49519

Floor pan holes were repaired with POR-15® Rust Preventive Coating, then pits were filled with Epoxy Putty.

The finish repair looks as good as new.

The floor pan was topcoated with Top Coat Chassis Black.

“ Rick Dale and the crew at Rick's Restoration in Las Vegas, Nevada use POR-15® products on many of their projects and POR-15® has been seen on the History Channel's series American Restoration. ”

Fuel Tank Sealer

POR-15® Fuel Tank Sealer was formulated and developed in our own laboratories due to the demand for a high-tech sealer impervious to all fuels, including the new Stage II fuels which have a higher alcohol content. It has superior strength and fuel resistance, and does not contain Methyl Ethyl Ketone, a highly flammable and deadly carcinogen (cancer-causing).

FEATURES:

- Resistant to all fuels, alcohol, additives & solvents
- Stops rust, corrosion & leaks
- Seals pinholes & seams
- Permanently flexible
- Chemically bonds to metal surfaces (even rusted)
- Light gray color for easier viewing inside the tank
- Available in quarts (capable of sealing a 25 gal. tank)

PRODUCT	SIZE	CODE
Fuel Tank Sealer	Gal.	49201
Fuel Tank Sealer	Qt.	49204
Fuel Tank Sealer	Pt.	49208
Fuel Tank Sealer	8 oz.	49216

Step-by-Step Fuel Tank Repair

Before: This fuel tank had small pin hole leaks on the end near the seam.

Step 1: Mix 1 quart **Cleaner Degreaser** with one quart of hot water. Use this solution to remove any gum, varnish or sludge from the inside of the tank.

Step 2: Pour in the entire bottle of **Metal Prep** to dissolve rust, coat the tank with zinc phosphate, and etch the metal for better adhesion of the sealer.

Step 3: After the tank is clean, drain the tank and rinse thoroughly with water. Let the tank dry.

When totally dry, pour in the can of **Fuel Tank Sealer**.

Step 4: After all surfaces have been coated, drain the tank for about an hour to remove excess sealer from the tank.

Step 5: Once repaired, use a fuel preservative & stabilizer to keep your entire fuel system in proper working order and to avoid "stale gas" problems in your future!

Fuel Tank Repair Kit

Fuel Tank Repair is more than just pouring in a quart of sealer and sloshing it around. If gum, varnish, sludge, or fuel is inside the tank, it must be removed first. Our POR-15® Fuel Tank Sealer, like other sealers, will not work in a contaminated tank. Find out what the pros already know... get our Fuel Tank Repair Kit with everything you need to do the job right.

KIT CONTAINS:

- *Cleaner Degreaser to remove gum & varnish from tank*
- *Fuel Tank Sealer to permanently seal tank*
- *Metal Prep to remove rust & prepare tank for sealer*
- *Detailed instructions*

- *All items included in our standard Fuel Tank Repair Kit*
- *Proven to effectively seal fiberglass tanks*
- *Brush for applying patching system to exterior of tank*
- *Safe for use with Ethanol fuel*
- *Fabric for sealing holes or reinforcing weak areas*

Motorcycle Fuel Tank Strip & Repair Kit

For customers who have had bad results from other inferior fuel tank sealers, we have developed this **Strip and Repair Kit**. It features everything found in our regular **Motorcycle Tank Repair Kit**, plus a quart bottle of our famous **POR-15® Strip** to first remove the inferior coating.

Caliper Painting Kit

Dress Up Your Calipers!

Nothing ruins the appearance of a sharp set of wheels like dirty, corroded calipers lurking from behind. Now, dress up those steel or aluminum calipers with a super-tough durable finish.

Our new caliper paint is beautiful in appearance, and strong enough to withstand the punishment of road debris and temperature extremes. And it looks terrific on any car or truck. Then, whenever your calipers get covered with dirt and brake dust, clean them with anything you like; the **POR-15® Caliper Paint** will stand up to just about anything.

KIT CONTAINS:

- (1 Qt) Cleaner Degreaser
- (4 oz) POR-15® Rust Preventive Paint
- (8 oz) Metal Prep
- (8 oz) Caliper Paint
- 2 Pair Gloves & 2 Foam Brushes
- 1 Roll Masking Tape
- Directions to do the job right
- Also available in individual 8 oz. cans

- Metal Prep
- POR-15® Rust Preventive Coating (black)
- Solvent
- One Pint POR-15® Engine Enamel (choice of color)
- Paint Brushes
- Safety Face Mask
- Latex Surgical Gloves

Accessories

PowerMesh

Reinforcing Fabric

This is the most effective reinforcing fabric we have ever found for use in repairs. While most fabrics tend to bunch or bulge, **POR-15® PowerMesh** lays flat, nicely, while you coat it with **POR-15® Rust Preventive Coating**. It is perfect for repairing holes in steel, fiberglass, wood, or even many plastics. Use it to “bridge” holes in floors, trunk pans, or even quarter panels. It is unbeatable when used with both **POR-15® Rust Preventive Coating** and our famous **POR-15® Epoxy Putty**. In fact, all three of these items are included in our popular **POR-15® Floor Pan and Trunk Repair Kit** (see page 21).

PRODUCT	SIZE	CODE
PowerMesh Reinforcing Fabric	9 sq. ft.	49533

How do you fill holes without welding?

This floorboard has lots of rust-through, but it can be fixed.

First, thoroughly clean the with **Cleaner Degreaser** and rinse off.

Next, prep the surface with **Metal Prep**, rinse off and let dry.

Cut a section of PowerMesh Reinforcing Fabric to fit the area. Be sure to use gloves and goggles for this project!

Coat the floorboard with **POR-15® Rust Preventive Coating** (silver used here) and while wet, place the PowerMesh Reinforcing Fabric onto it. Add a few coats of **POR-15® Rust Preventive Coating** on top, working it into the fabric.

Once the coated PowerMesh dries to a rock-hard finish, it can then be coated with **POR-15® Top Coat**.

Accessories

Boss Gloss

Clean & Protect Plastic, Rubber & Vinyl

Treat and preserve plastic, rubber, and vinyl with **POR-15® Boss Gloss**. After we had tried some of the big national brands, we were disappointed with the way they seemed to fade away so quickly, and in no time at all, we had to reapply the stuff. Also, it seemed to attract dust. Our chemists told us that this was partly because the big companies reduce the amount of solids in their products to save costs, and partly because they use alcohol and other solvents. We decided to make our own premium quality product, in the style and tradition of all other **POR-15®** Products, with more solids, and NO alcohol or solvents which can remove vital plasticizers, and lower the life expectancy from vinyl and rubber. Our special combination of premium chemicals turned into a terrific product, which we call **POR-15® Boss Gloss**. We were delighted to learn that, as a side effect, **POR-15® Boss Gloss** seems to repel dust too!

Try **POR-15® Boss Gloss** one time on the interior of your car or truck. You will be delighted at the results and pleased by how long it lasts. Your complete satisfaction is guaranteed!

NOTE: Not for use on cycle seats or other surfaces where a slippery surface could be hazardous.

APPLICATIONS:

- Car and Truck Interiors
- Dashboards
- Plastic
- Rubber
- Tires

Accessories

Strip Gel

Aircraft Paint Remover

POR-15® Strip Gel provides a superior aircraft-grade formulation resulting in a highly effective paint remover that quickly lifts the toughest automotive coatings from metal surfaces. Its heavy-bodied consistency provides excellent vertical hold perfect for upright and difficult to reposition projects.

The **Strip Gel** formula is safe for all types of automotive metal.

PRODUCT	SIZE	CODE
Strip Gel	Gal.	40501

FEATURES:

- *Fast-acting*
- *Excellent vertical hold*
- *Safe for all automotive metal*
- *Aircraft-grade strength*
- *Removes multiple layers of automotive and industrial paints or finishes*

Always wear safety goggles & latex gloves when using our products!

Scuff Pads

POR-15® Scuff Pads are constructed of tightly-woven coarse fibers with EASY TEAR center perforation. **POR-15® Scuff Pads** will make sanding or scuffing any surface a breeze... EVEN CURED **POR-15® Rust Preventive Coating!** Pack of three 6"x 9" pads.

Accessories

Rust Remover

Rust Dissolving Wash

POR-15® Rust Remover will safely remove light to even heavy rust completely from metal surfaces and will not affect plastic, PVC, Viton, and most paints. One gallon derusts up to 300 pounds of heavily rusted steel. Rust Remover will not harm unrusted steel and is safe on other metals. Rust Remover has no fumes or bad odors and no VOCs. No sanding or scrubbing required. POR-15 Remover works in as little as 20 minutes for light rust or overnight for heavy rusted metal.

PRODUCT	SIZE	CODE
Rust Remover	Gal.	40701
Rust Remover	Qt.	40704

Solvent

POR-15® Solvent is the only appropriate solvent to use when thinning our coatings for spray painting. We developed it precisely for this purpose, at the request of many of our loyal customers.

Concrete Primer Sealer

2 Part: High Solids Epoxy Coating

POR-15® Concrete Primer Sealer has been developed to function as a primer sealer on properly prepped concrete surfaces and also acts as a foundation for the POR-15® Floor Armor System. POR-15® Concrete Primer Sealer offers durability to any floor coating project with the convenience of a low VOC water-based system. It brings the adhesion performance of the POR-15® Floor Armor system to the next level.

PRODUCT	SIZE	CODE
Concrete Primer Sealer - CLEAR	1 Gal.	47901
Concrete Primer Sealer - CLEAR	5 Gal.	47905

FEATURES

- *Improves Adhesion for Topcoating*
- *Concrete Dustproof*
- *Quick Recoat Time*
- *Good Chemical Resistance*

Floor was sealed with POR-15® Concrete Primer Sealer and finished with the POR-15® Floor Armor Kit

Floor Armor Kits

Now, seal your floor permanently, with **POR-15® Floor Armor** floor painting kits, from the makers of **POR-15® Rust Preventive Coating**.

No need for acids; no need to flood your floor with water. Just use our easy degreaser on any heavy oil or grease stains, vacuum away any dust or dirt, and paint right over everything with **POR-15® Floor Armor**. Get the same fantastic results you have come to expect from world-famous **POR-15® Rust Preventive Coating**, with this terrific new product. It is the result of several years of development by our own chemists and product specialists.

Use **POR-15® Floor Armor** in heavy traffic areas. It can take the abuse from forklifts, floor jacks, and constant traffic. You'll wipe up oil and grease stains with a rag, and keep dust down too.

Each gallon covers approximately 400 sq. ft.

BASIC KIT CONTAINS:

- Floor Armor
- Hardener/Activator
- Non-slip Aggregate
- 8oz Grease and Oil Remover
- 1/4" Nap Roller
- 1/2" Nap Roller
- 9" Birdcage Frame
- 2 - 11/2" Chip Brushes
- Stir Stick
- Rubber Gloves

2 1/2 Car Basic & Deluxe Kits

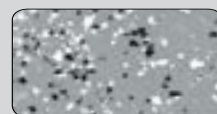

The Deluxe Kit contains everything in the Basic Kit but also includes **POR-15® Clearcoat** and decorative color chips.
