# RAPTOR®

## TOUGH AND TINTABLE PROTECTIVE COATING

RAPTOR Tough and Tintable Protective coating is a durable urethane coating that provides surfaces with a protective barrier that can withstand the toughest situations.

Developed to tolerate most climatic conditions, Raptor is U.V. Resistant and won't fade or "chalk" even after hours in the sun. Raptor is also water resistant and helps to protect surfaces from rust, making it perfect for surfaces that are frequently exposed to water, including salt water.

Raptor's versatility makes it perfect for almost any application. Spray or roll Raptor on high traffic areas; it's scratch and stain resistant and easy to clean, simply hose it off. Its flexible formulation can handle impacts without cracking, making it perfect for its most popular application as a truck bedliner.

Raptor is unlike other bedliners or protective coatings. 2-component urethane technology far surpasses the durability of epoxy and 1-component coatings. And in case it does scratch (which is tough to do!), Raptor can easily be repaired. You can't do that with most of the other bedliners and protective coatings!

Raptor protects industrial surfaces in the harshest environments as well as the smaller surfaces we rely on every day. It's durable, tintable, looks great and lasts a long time.

### IDEAL FOR MULTIPLE APPLICATIONS

### USE ON VARIOUS SURFACES

**NEW!**

### Raptor Color

Color is a concentrated tint for use with Raptor Tintable Protective coating. Mix Raptor Color with Raptor Tintable Base to give a rich, UV resistant color that won't fade even after years in the sun. Available in a wide range of colors, choose either a single color or use different colors on other areas to create your own custom look.
