

MIRKA

Mirlon Total[®]

A consistent sanding result.

Mirlon Total is one of our indisputable all-round products. A relation of the fibre-based Mirlon abrasive, Mirlon Total cuts even better producing a rapid sanding result that delivers a dense scratch pattern and a perfectly even, high-quality surface ready for painting. Mirlon Total is now available in disc form for machine sanding with a new net interface, making it compatible with our dust-free solutions. Mirlon Total is strong and long-lasting, as both sides of the abrasive can be used for sanding, and it is flexible and easy to use, making it perfect to achieve a smooth matt finish and for feathering out effectively.

Mirlon Total grit range:

360	800	1500	2500
Very Fine	Xtra Fine	Ultra Fine	Micro Fine

We call it Total for a reason.

Mirlon Total®

Mirlon Total is the natural choice when performing collision repairs, but it is also well suited for new vehicle manufacturing, construction and decoration, wood and metal processing, marine production, and composites processing. It performs well on steel and other metals and alloys as well as plastics, lacquers, paints and primers, and synthetic materials.
